PROFESSIONAL SUMMARY

Web developer, graphic designer and community builder with a BSc in Computer Science (KNUST) and 3+ years delivering across all three. I design, build and ship responsive web applications in HTML, CSS, JavaScript and React; produce brand, social and campaign content for small brands and organisations; and grow online communities while automating the work behind them. I built and deployed SACSU-KNUST's member onboarding platform — a registration web app wired to n8n automation, a Google Sheets CRM and personalised HTML email journeys — replacing manual paper-form intake. Alongside development I have produced 115+ digital design assets and edited short-form video, and I use AI tools (ChatGPT, LLM agents) daily to speed up build, copy and repetitive tasks. Detail-oriented and fully remote-ready: comfortable owning client communication, scoping and deadlines end to end.
